Subject: RE: Deer Park Fire

These are two firefighting foams being used in Houston for the ITC fire. We are getting questions about PFOA/PFAS/PFOS concerns.

From my quick read of the attached, both products contain PFAS. The NMS product has PFOA (maybe others?), the Thunder Storm product has 6-carbon PFAS. This is not a definitive answer. It would be helpful to understand the basis for the question and the purpose of the need.

See below and attached. I presume we need an answer to this ASAP. Thanks.

Do these foams contain PFOA/PFAS chemicals?
